

## Correcting Web Browser Cookie-Related Errors With the WellFit For Life Website

### Introduction:

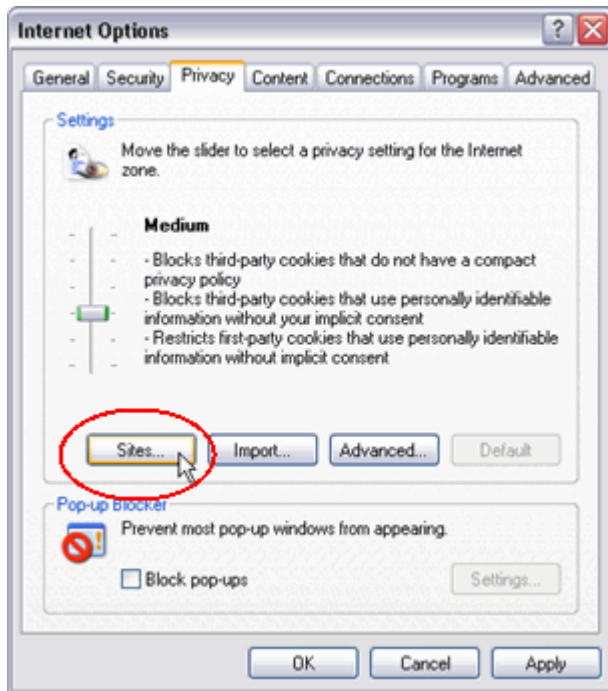

The WellFit For Life website provides many tools and applications to our participants that require a web browser to accept cookies. In the event that a participant has cookies disabled, many of the functions of the website (Activity Log, Ask the Experts, etc) will not function properly. In order to correct the problem, the participant will need to configure their web browser to accept cookies from the TeachersHealthTrust.Org website.

### Method:

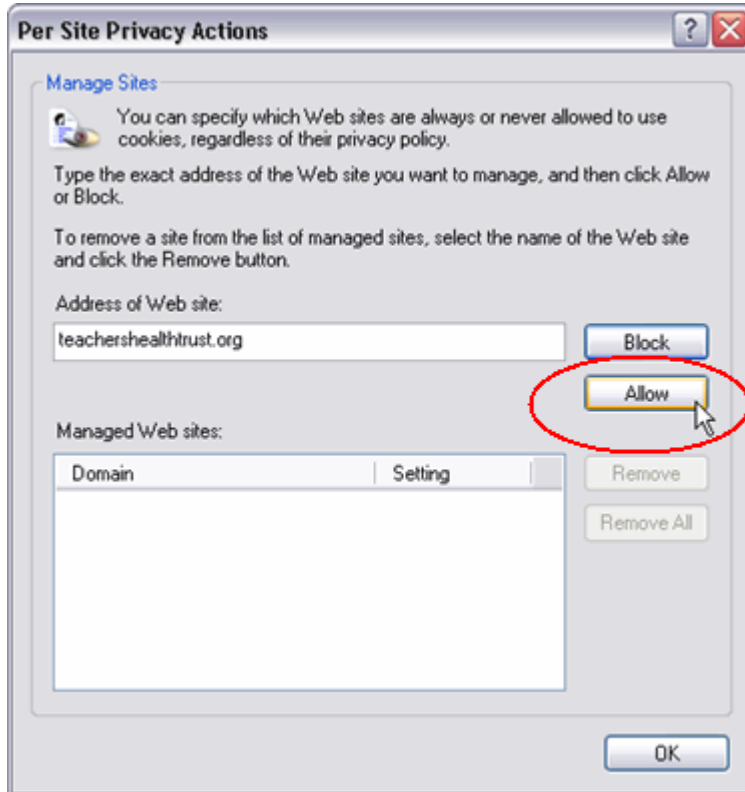

1. In Microsoft Internet Explorer, click on the Tools menu and select "Internet Options."

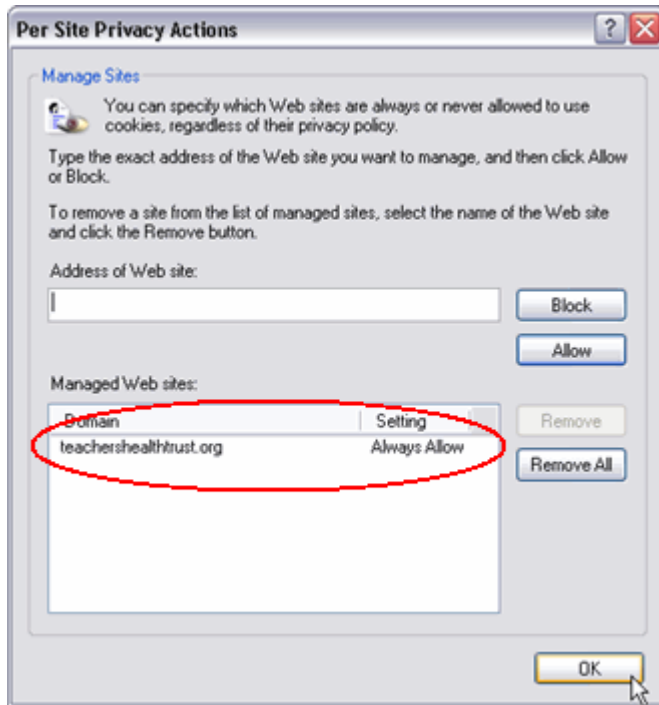

- Click on the Privacy tab, and then click on the "Sites" button.

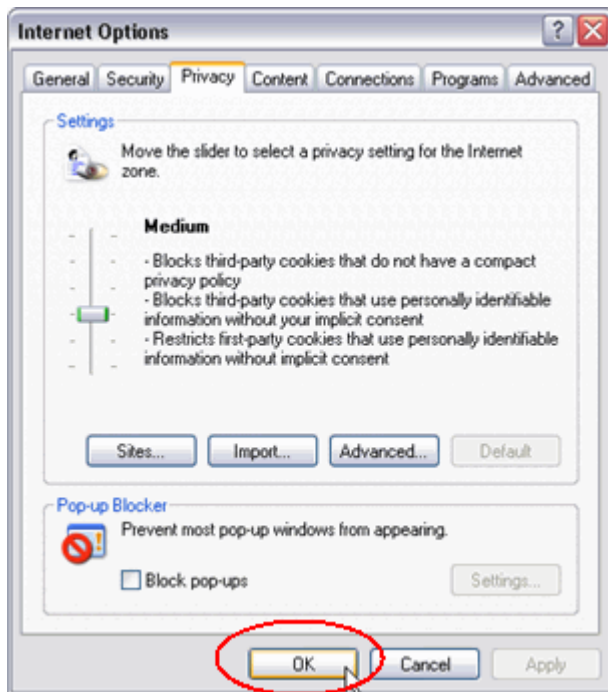

- Type "teachershealthtrust.org" into the Address of Web site field, then click the Allow button.

4. Make sure that “teachershealthtrust.org” appears in the Managed Web sites box, and that the setting says “Always Allow.” If everything is correct, click Ok.

5. Click Ok on the Internet Options window. You will now need to close Internet Explorer and then reopen it before your changes will take effect.

You should now be able to use the Wellfit For Life website normally!
